

NEWS RELEASE

Home Telehealth awarded framework agreement from Buying Solutions

11TH August 2010

Home Telehealth Limited one of the UK's leading Telehealth service providers announced today that it has been awarded a framework agreement by Buying Solutions for the supply of Telehealth Products, Telehealth Services, Telecoaching Products and Services and Managed Services. Buying Solutions is the national procurement partner for all UK public services and part of the Efficiency and Reform Group within the Cabinet Office.

The Buying Solutions Telecare framework agreement is for two years (with an option of two further one year extensions) also forms part of the Department of Health's vision of building a Telehealth and Telemedicine infrastructure throughout the UK, as outlined in the recent Government White Paper '*Equity and Excellence: Liberating the NHS*'. The Buying Solutions framework agreement covers the purchase, installation, maintenance, monitoring, coaching and delivery of managed services for Telecare, Telehealth and Telecoaching.

This is good news for all NHS Trust, Local Authority and UK Public Sector contracting commissioners who will now be able to ensure best value for money, procurement efficiency and time saving from an "on-line" catalogue of Telehealth and Telemedicine solutions under standard terms and conditions, managed by Buying Solutions, removing the need for separate tendering arrangements.

Home Telehealth's full range of Telehealth, Telemedicine Products and Managed Services will be available for procurement through the new framework agreement and further information on how to order these solutions can be found on either the Home Telehealth website: www.hometelehealthltd.co.uk or the Buying Solutions website: www.buyingsolutions.gov.uk

Peter Range, Chief Executive for Home Telehealth Limited said:

“Home Telehealth is delighted to be awarded the Buying Solutions framework agreement and looks forward to working with the NHS and Public Sector commissioners to expand upon the Telehealth and Telemedicine pilot programmes they have tested over the past few years”

“The Buying Solutions framework agreement will provide Home Telehealth with the ideal platform to showcase our market leading Telehealth and Telecoaching products and services and managed services to UK NHS and Public Sector commissioners and contractors for health, care and well-being. Services that have over the past 10 years supported thousands of people to live independently in their own homes and avoid the need for hospitalisation and or expensive residential care”.

“Home Telehealth has over 6 years experience in the delivery of ‘end to end’ clinical managed services in partnership with NHS Trusts, patients, clinicians and commissioners for people with long-term conditions, in addition, these innovative services have recently received two National Awards for ‘Partnering with the NHS and delivering Innovation leading to improved patient care whilst reducing operating costs for the NHS”.

“The Buying Solutions framework agreement comes at a time when public sector organisations are looking to deliver greater efficiencies and more community-based services with fewer resources and embracing an ‘end to end’ clinical managed service that is not focused on the technology, but the patient’s care needs, is a proven way of achieving outcomes that provide a good return on investment for Commissioners”.

Ends.
